EXPERIENCE

FullStack Developer

allegro

Allegro

01/2022 - 01/2025 Remote

React + Java / Kotlin

- Member of a 7-person team focused on collaboration and expanding a common level of domain knowledge.
- Creating and developing React micro front-ends within a single-spa architecture.
- Developing and maintaining Java / Kotlin microservices used in the client's solution.
- Testing on various test environments followed by complex deployment to production.
- Leading business and technical tasks.
- Maintaining the team's help channel, providing answers and solutions to questions from customers, business or other teams.
- Conducting SCRUM meetings, presenting the team's achievements on demos.

Software Development Trainer

Software Development Academy

12/2019 - 04/2022 Gdańsk, Poland

- Over 60 hours of teaching web development basics for 28 adult students

FullStack Developer

AREX

AREX Sp. z o.o.

04/2019 - 08/2021 Gdynia, Poland

Ruby on Rails + React

- Maintained and developed a web application for a major Polish railroad company, connected to thousands of track heating devices across hundreds of stations; enabled data visualization, validation, and editing.
- Designed and implemented a React frontend for a bus charging station management app, supporting charts, maps, large data editing, and a specialized display mode for harsh environments with on-screen keyboard.
- Built a front-end app integrated with GitLab API to standardize and secure configuration file editing, significantly speeding up and safeguarding workflows.

Junior Developer

atena

Atena Usługi Informatyczne i Finansowe S.A.

07/2017 - 04/2019 Sopot, Poland

C# + VBA

EDUCATION

Bachelor's degree, Computer Science with a specialization in Web Applications and Databases

Uniwersytet Gdański

01/2015 - 12/2019

- Ranked in the top 10% in the second year
- Started work in the field after the second year of studies
